

# Cylindrical & Wire Duct Brushes

Cylindrical duct brushes are used to effectively clean dust, silt and debris from ducts and pipes. The nylon bristle type has a polypropylene core and nylon bristles for the toughest of cleans whilst protecting the duct walls. The nylon brushes have rotating eyes and are 350mm long overall. The wire pig brush is mainly for metal or concrete ducts and aggressively removes the toughest of debris, these have fixed eyes. For the most difficult of routes, we can supply half brushes or articulated types. Nylon brushes can be made to any size, standard units are listed below
