

Duct Proving Mandrels

Polypropylene mandrels are used to prove the internal bore of a pipe or duct prior to the installation of the cable. We can supply any size of mandrel and in any style. Cylindrical, spherical and oval for complex routes or dumbbell style for the largest of applications. The diameter is normally 10% less than the ID of the pipe and the length generally 50% longer than the diameter

- Polypropylene construction
- Steel rotating eye each end (43mm has wire rope eye)
- Custom made to your exact requirements
- Same day turnaround on most cylindrical mandrels
- Standard sizes below (spherical lengths = diameter)
