

Mechanical Screw Jacks

The classic mechanical jack range is simple in operation and sturdy by design with square bases giving added stability against equivalent octagonal bases often seen. Jacks all steel construction with sturdy 45mm diameter acme thread, heavy duty cast cup and a zinc plated finish for longevity and long term appearance of the product

Model	Capacity	Base Size	Closed Height	Open Height	Weight Each
<u>MJ3</u>	3000Kg/Pr	300x300mm	500mm	815mm	17Kg
<u>MJ6</u>	6000Kg/Pr	450x300mm	635mm	950mm	21Kg
<u>MJ8</u>	8000Kg/Pr	600x300mm	890mm	1205mm	29Kg

The jacks come with a variety of options sold separately - OB1 operating bar, MJS01 jack plinth for increased height and stability, DB spindle bars of various sizes & lengths and spindle locking collars to hold the drum in place
